Harness Catalogue

# **SPECIAL HARNESS CATALOGUE**

**SEASON 1910 and 1911**

# **EMMONS - HAWKINS HARDWARE Co.**

**MANUFACTURERS, IMPORTERS AND JOBBERS**

**Hardware, Tools, Stoves, Household Goods,  
Cutlery, Guns, Ammunition, Contractors' and  
Blacksmiths' Supplies, Building Material,  
Paints and Oils, Gas Fixtures, Mantles, Iron,  
Steel, Etc.**

**HUNTINGTON, W. VA.**

This catalogue presents to your notice a representative line of Harness, Harness Parts and Kindred Goods for the Fall of 1910 and the Spring of 1911. While this is an advance catalogue, giving a fair idea of the goods usually in demand for the general trade, we might add that we are in position to supply on short notice almost anything desired by the contractor, the farmer, the stableman, etc.

Mail orders may be intrusted to us, with the assurance that our prices will be the lowest consistent with shipping facilities and market conditions. Huntington is situated on the Ohio River and enjoys the advantage of four important railway lines, thereby securing good rates by both river and rail. We make special effort to ship all goods the day the orders are received.

We think our friends will agree with us that it is more satisfactory to place your orders with an established house close at home, with a good reputation for reliability and fair and honorable dealing, than it is to send your orders far away to dealers not well known to you. Write us for quotations on your season's requirements.

We are thankful to our many friends for their liberal patronage, which has made possible our Extensive Stock and Efficient Service, to merit a continuance of their many favors will be our constant aim.

## Hames

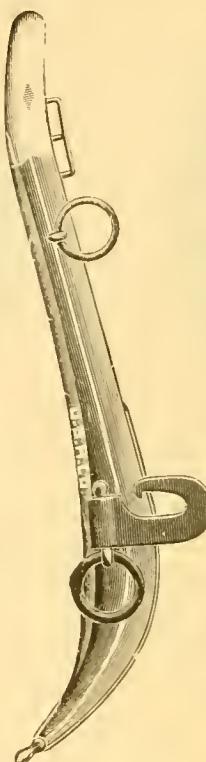

"Damascus" Finish, the new substitute for varnish or oil, is used on all these Hames. Has all the good points of both varnish and oil and eliminates the objectionable features. It covers all steel parts and retains luster. It fills the grain of the timber and retains the gloss. It collects neither dust nor dirt, as the oil finish. It does not mar in transit like varnish. It is a hard, durable, and lustrous finish.

## Hame Fasteners

### The "Success" Hame Fasteners.

Stronger and more easily adjusted than any leather hame strap or other metallic fastener. Will not shrink or swell in dry or wet weather. Easily put on; cannot become detached from hames or get out of working order. Indestructible; will last as long as the hames. Hook box end into the off hame, closing down hook so that the hame fastener cannot become detached.

The "Success" Fastener. Bronzed Steel..... Per dozen. \$4.50

### The "Dodson" Hame Chain.

The cut represents this chain in its latest improved form. The links are strengthened and stiffened by corrugations, which also add much to the fine appearance of the chain. The body part hooks into the hame loop and is securely held there by the thumb piece, itself held by a first-class spring which, by its position, is secure from accident. This feature permits the chain to be transferred from one pair of hames to another, and in much less time than a hame strap can be. The end of the chain can be snapped up out of the way if desired. Are all steel, strong, secure and light. They work easily, never yield nor slip. They will outwear a dozen leather hame straps, and they can be hitched and unhitched in much less time. They do away with every objection that applies to other hame chains. They fit all work hames and all sizes of collars.

The "Dodson" Fastener. Bright Steel..... Per dozen. \$4.00

## Collar Pads

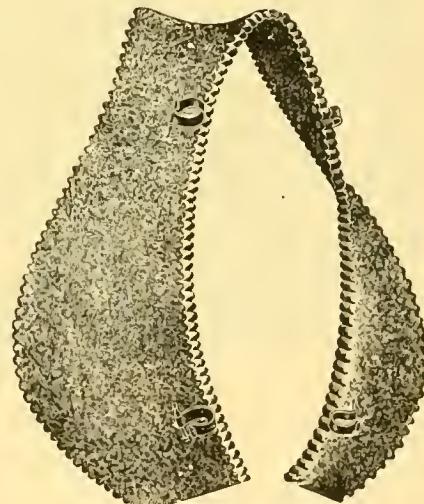

**"Rex" Collar Pad.**

Brown and white drill, composite stuffing, four rows of quilting, three hooks. Made in lengths 16 to 25 inches.

**“Red Edge” Collar Pad.**

Old gold drill, composite stuffing, five rows quilting, four hooks. A strip of red felt (not pinked) inserted and extending around the outer edge gives the pad a handsome and finished appearance.

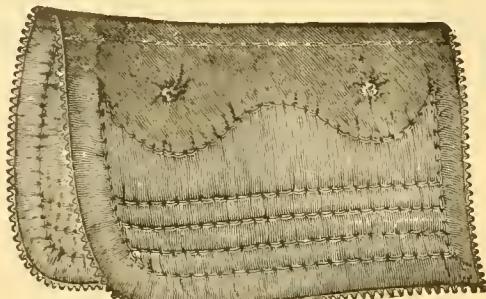

### Felt Collar Pad.

For heavy team collars. Only the best grade of felt is used in the manufacture of these pads. Good smooth stock, strong colors, four hooks.

## Wagon Umbrellas

This Umbrella spreads 70 inches and has eight heavy detachable steel ribs, 40 inches in length. The top notcher is especially designed to cover the hooks and protect the cover. Ribs and stretcher made of special tempered steel. Removable cover of heavy drill, which is more serviceable than duck. The metal end socket, 1¼ inches in length, is clinched to rawhide and then sewed on the cover. The pole, 1½ inches in diameter, made of extra selected hard-wood, oil finished. All metal parts are japanned.

Heavy Wagon Umbrellas. 8 Steel Ribs. Extra Heavy Drill. Complete, with All Fixtures..... \$30.00

## Frank Miller's Preparations

### Miller's Harness Oil.

This Oil has earned for itself the reputation it has so long maintained, being superior to anything produced for the purpose—softening and preserving the leather.

Per doz.

No. 0—In Half Pint Cans. One dozen in a box...	\$3.00
No. 1— " Pint " " " " ..	6.00
No. 2— " Quart " " " " ..	9.50

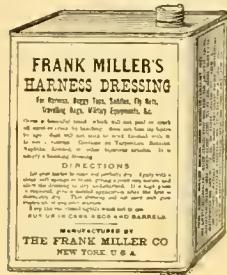

### I. X. L. Harness Oil.

A cheaper grade of Harness Oil than the Frank Miller Oil. It is superior to any article of this class in the market.

Per doz.

No. 0—In Half Pint Cans. One dozen in a box...	\$3.00
No. 1— " Pint " " " " ..	4.50
No. 2— " Quart " " " " ..	7.00

### Miller's Harness Dressing.

A superior article for general use. Unequalled for use in livery, express and private stables. An indispensable article wherever harness is in use. Gives a beautiful finish that will not peel, crack or smut, and to which dust will not stick.

Per doz.

In Pint Cans. One dozen in a box.....	\$5.50
" Quart " " " " ..	9.00

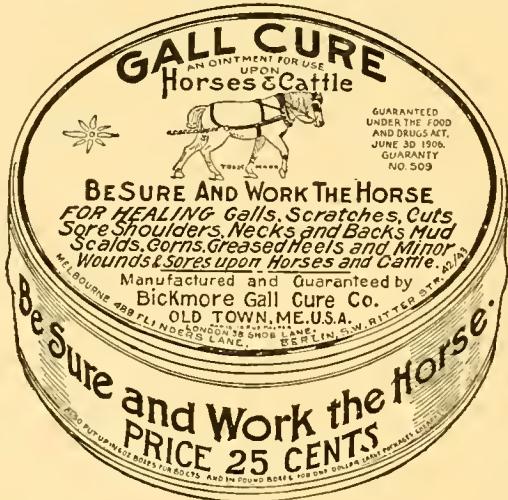

### Miller's Axe Oil.

Superior to castor oil, lasts longer and will not gum. Will not run from the boxes, if properly used. Not affected by climatic changes.

Per doz.

In Pint Cans. One dozen in a box.....	\$4.50
" Quart " " " " ..	9.00

## Bickmore Gall Cure

In 2-ounce Boxes. One dozen boxes in carton.....	\$3.00
--	--------

The manufacturers guarantee every box of Gall Cure. Money refunded if it fails to cure Collar or Saddle Galls upon horses, under the harness, while the horse is worked; Chafes, Bruises, Cuts, Mud Scalds, Scratches, Grease Heel, Rope Burn, or any minor wound or sore upon horses and cattle. It gives immediate relief and quick cure for cracked, sore teats in cows, and for mange in dogs.

## Jacks and Wrenches

### STEEL BUGGY, CARRIAGE AND WAGON JACKS.

This is a powerful Jack, operated by pinion and lever, and is so constructed that the greatest leverage is obtained. When the load is lifted and the handle is down, the jack becomes locked and holds load in position until lever is raised. Three sizes.

					Per dozen.
No. 0—Buggy Size.	Capacity, 500 pounds.	Weight about 6 pounds.			\$12.00

### KEYSTONE CONNECTING LINKS.

The Keystone Connecting Link for connecting new or repairing broken chains of any kind is composed of two corresponding halves centrally pivoted on the same axis. The inner flat face of each is pivoted with a projecting lug and recess, so that when closed and in use they mutually interlock, and by abutting against each other, lateral displacement of the two halves, and consequent spreading or parting is rendered impossible. The Keystone Link is drop forged from an especially tough grade of bar steel.

## Heider Single and Doubletrees

Per set.

**Two-Horse Plow Doubletree Set.** Doubletree,  $1\frac{1}{4} \times 3\frac{5}{8} \times 42$  inches, with Steel Clevis and Wood Riveted at each end; two Singletrees,  $2\frac{3}{8} \times 30$  inches, with Welded Center Clips with Rings, Malleable Ferrules with Steel Hooks, Hickory, Painted, Striped and Varnished. Weight, 15 pounds per set..... \$1.70

### Six Complete Wagon Sets Crated.

A complete set consists of the following: One Doubletree,  $2 \times 4 \times 48$  long, with wrought plates, lockpin clevis clip and stay chain ring and wood riveted at each end. Two Singletrees,  $2\frac{5}{8} \times 36$ , with welded center clips with ring, malleable ferrules with steel hook. One Neckyoke,  $2\frac{5}{8} \times 40$ , with center irons and malleable ferrules with steel ring. Center clip on Singletrees are put on hot. Hickory wood only. Weight, per set, 30 pounds.

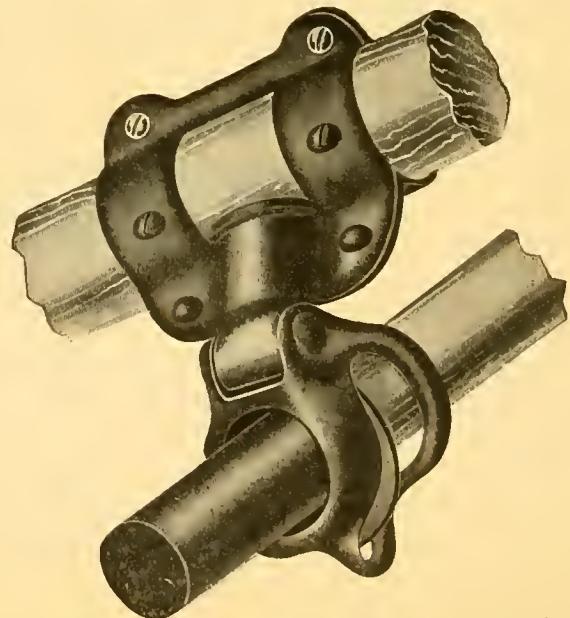

Cut shows six sets of Hickory Painted Wagon Sets, crated. The crate is built to fully protect them in shipping from being marked or scratched.

Six Complete Sets, in Crate, Painted, Striped and Varnished. Weight, 225 lbs. per crate..... \$33.00

### Luse Safety Neckyokes.

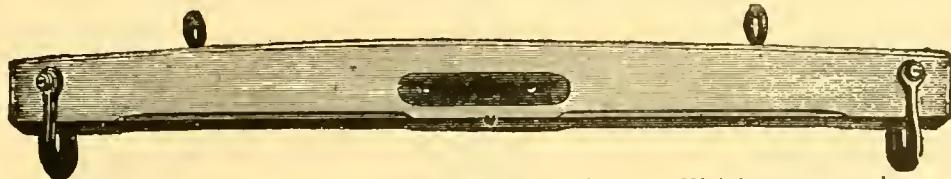

This Neckyoke is simple and sure. It is strong and cannot get off the pole until the yoke is turned half way over. It cannot hammer the pole, therefore it is noiseless. The band of the yoke is of two pieces of malleable iron, which is firmly riveted on each side of the swivel bolt. The safety device can be readily understood from the cut. The pole cannot drop out when one of these Neckyokes is used and makes an absolute safety.

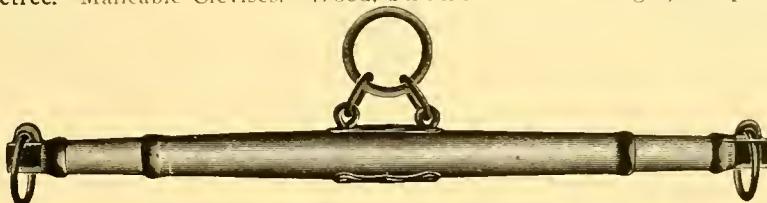

Per doz. \$16.00

Neckyoke, Complete. Varnished.....

Made of best oak stock, full of the life and elasticity of the original leather, which gives the most satisfactory service.

## Rein Supporters

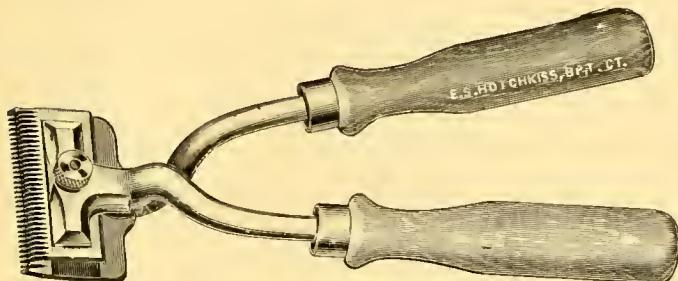

Read's Rein Supporters. Imitation Rubber. To attach to Breeching.....

A simple, practical, common-sense device that prevents accidents, saves annoyance, adds to pleasure of driving. Reins never get under horse's tail. Their simplicity, practical working, ornamental appearance, little cost, make them appeal strongly to the driving public. Quarter dozen pairs on display card.

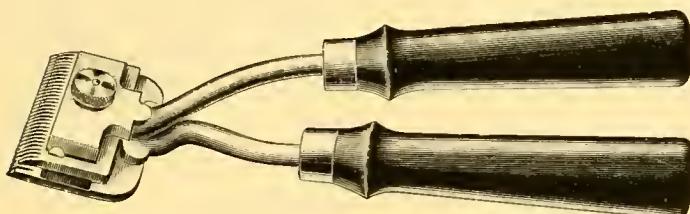

Per doz.  
\$3.00  
3.00

## Horse Clippers

No. 25—Standard Hand Clipper. Polished. Full Length, 10½ inches. 3¾-inch Plate..... Each. \$1.75

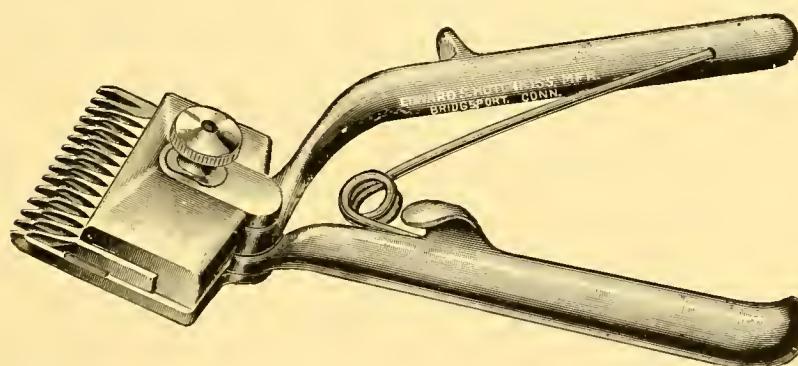

A strong, well-made and finished medium price Clipper. Entirely taken apart by removal of tension bolt. All metal parts nicely polished. Black enameled handles and nickel plated ferrules. A satisfactory, neat and taking article. Weight, about 1½ pounds.

No. 40—Ball Bearing Hand Clipper. Nickel Plated. Full Length, 11 inches. 3¾-inch Plate..... Each. \$3.00

This Clipper is made from the best material throughout, is finely polished and nickel plated, has nickelized ferrules and oval turned hardwood handles finished in imitation of vulcanized rubber.

The anti-friction or ball bearing feature is so constructed that the balls are securely held in the cap by the spring piece, thus avoiding any unnecessary loose parts to be mislaid when the Clipper is taken apart.

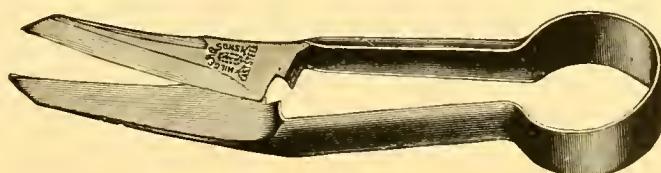

No. 100—Ball Bearing Fetlock Clipper. Fine Finish and Nickel Plated. 6½ inches long. 1¾-inch Plate.... Each. \$2.50

This is a very strong, substantial and satisfactory article, finely finished and nickel plated and recommended as the most satisfactory Ball Bearing Fetlock Clipper ever brought out.

The anti-friction or ball bearing feature is so constructed that the balls are securely held in the cap, thus avoiding any unnecessary loose parts to be mislaid when the Clipper is taken apart. Has strong outside spring of best music spring wire. Plates are carefully ground and have strong coarse cutting teeth.

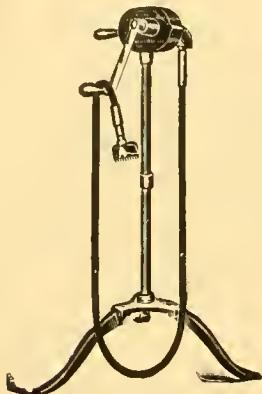

## Mule Shears

No. 1090—Hilger Mule Shears. Half Polished. Curved Blades. Full Length, 9 inches..... Per doz. \$4.30

Half Dozen in a Box.

## Horse Clipping Machines

### Enclosed Type Clipping Machine.

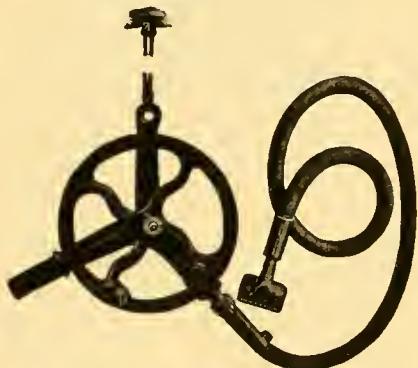

### Ball Bearing.

A new Clipping Machine, sturdy, compact, perfect in every detail of material and workmanship, and at a price within the reach of every farmer and horseman in the land.

Cast iron tripod with 1-inch tubular upright, japanned. All gears are cut from solid steel, made file hard and enclosed in dust-proof metal box. They run in oil and operate practically without friction or wear. Crank handle runs slowly, but the machine works rapidly. The steel flexible shaft is canvas covered.

Extra Knives, for Horse Clipping Machines, \$2.50.

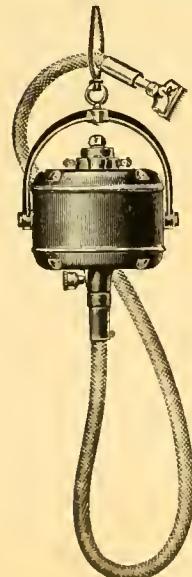

No. 1— <b>Horse Clipper.</b> Enclosed Type. Crank Handle. Complete with Knife and Handle, and 6 feet of Flexible Shaft. Weight, about 36 pounds.....	Each. \$ 6.75
<b>Sheep Shearing Attachment.</b> Consisting of Solid Jointed Shearing Shaft, Shearing Handle, four Combs and four Cutters.....	7.75
<b>Combination Horse Clipper and Sheep Shearer.</b> Complete .....	14.50

## The 20th Century Horse Clipping Machine.

It turns easily and works fast, and anybody can operate it. It is suspended from the ceiling by a rope, which enables the operator to reach every part of a horse with ease. Gear is 12-inch, positive drive. Flexible shaft is steel. Knives are highest grade, same as furnished on other machines. No stable is too small to profit from the use of the 20th Century Clipper.

**The 20th Century.** To suspend from ceiling by rope. 12-inch Gear. Complete with Flexible Shaft..... \$5.00 Each.

### Electric Clipping Machine.

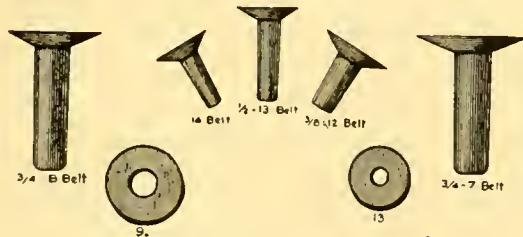

The motors of these machines are extra well made and are furnished complete so that they can be attached to electric incandescent light socket. The flexible shaft is  $6\frac{1}{2}$  feet long, and connects directly with the armature shaft of the motor. This eliminates short bends in the shaft near the point of connection, and gives the utmost freedom of motion. The motors are perfectly made, and are self-oiling. Any one can make the connection and the machine can be started or stopped by merely turning the ordinary electric switch, the same as with an incandescent lamp.

Absolutely noiseless. Has a self-oiling device, can be started and stopped instantly, requiring but little current, cannot be injured by careless handling; can be hung out of harm's way when not in use. No electrician is required to install same, connection being made in identically the same manner as screwing in an incandescent lamp globe. Each machine is furnished with automatic starting box.

When ordering, be sure and specify voltage if direct current. If alternating current, specify voltage, number of alternations and periodicity.

		Each.
<b>Electric Clipping Machine.</b>	110 Voltage Direct Current. Weight, boxed, 80 pounds.....	\$40.00

No. 1—Assorted  $\frac{3}{16}$  to  $\frac{8}{16}$ . In Paper Boxes of 100 Rivets. 12 Boxes in Carton..... \$0.70

## Draw Gauges

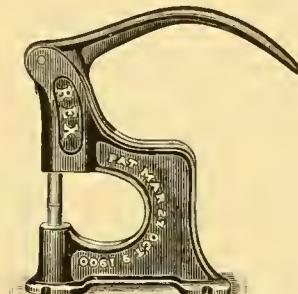

Japanned malleable iron hollow handle, polished head, 4-inch polished steel slide, graduated  $\frac{1}{8}$ -inch, with set screws. Total length, 5 inches. Weight, about 12 pounds per dozen.

No. 51½—Tempered Steel Blade..... \$25.00

Packed Six in a Box.

## Riveting Machines

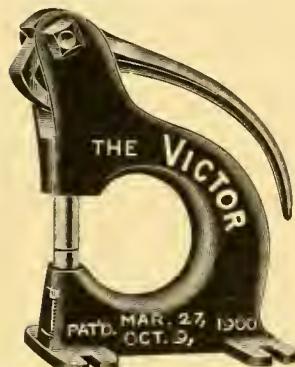

### The "Rex" Riveter.

This machine is designed to meet the demand for a low-priced machine, but the quality is not slighted in the least. At the price there is no better machine made. For No. 1 Tubular or Bifurcated Rivets, adjusts automatically to any length rivet. Case hardened steel plunger and anvil, malleable iron frame, finished in black Japan. One in a paper box. Shipping weight per dozen, 38 pounds.

Per doz.

The "Rex" Riveter. Black Japanned. Gilt Finish. Weight, 2 $\frac{3}{4}$  pounds..... \$12.00

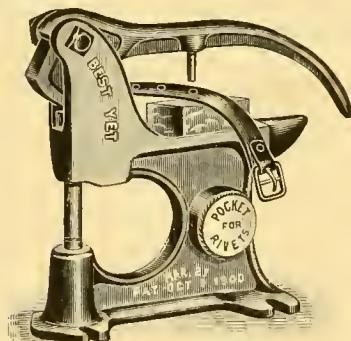

### The "Victor" Riveter.

Made of malleable iron and hardened steel, and is absolutely first-class and fully guaranteed as to workmanship and material. Will do perfect work with No. 1 Rivets, either tubular or split. Sets Rivets all lengths, up to and including 10 $\frac{1}{16}$ . It automatically adjusts to all lengths without change of any kind. This machine is especially adapted for harness and repair work. Has a larger throat opening than any machine of this class on the market.

Per doz.

The "Victor" Riveter. Two Coats Black Japan, Gilt Letters. Weight, about 4 pounds..... \$18.00

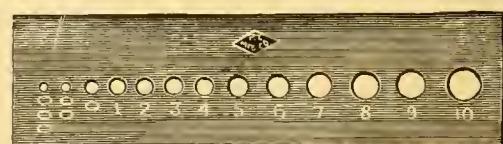

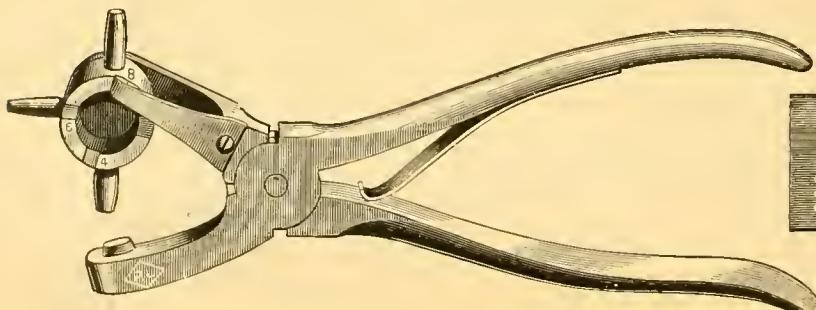

### The "Best Yet" Riveter.

Provided with a punch for punching the buckle holes. This machine will be found the handiest tool on earth for quickly repairing harness, belting and straps of all kinds. It automatically adjusts and will set any length tubular or split, harness or shoe rivets without change of any kind. When punching for buckles lay a board, one inch thick, on the face of the anvil and your strap on this board; then by pushing the lever of the machine down you will be able to force the punch through the leather with the greatest ease. "Best Yet" is bound to outsell all others.

Per doz.

The "Best Yet" Riveting Machine. Double Japanned, Gilt Finish. Weight, 3 $\frac{1}{2}$  pounds..... \$24.00
